I'm not sure about the draft inspection report. I'll check with OECA. I think it is OK to send the 308 letter.

Rick can I share this and John Armstead's email with ORD?

Cecil,

I saw that John sent copies of the TSCA NOV and inspection report. I've attached a copy of the CWA 308 letter that went to Chemours for their Washington Works plant in WV. I also have copies of the 308 letters that went to Chemours for their North Carolina and New Jersey facilities. Also attached is a copy of the draft NPDES inspection report with CBI redacted. That inspection was led by OECA and their contractor. A member of WPD's NPDES Enforcement Branch participated in that inspection as did a representative from WVDEP's NPDES program. I am trying to find out from OECA if the draft inspection report was shared with WV. I will also find out how the NPDES enforcement action was coordinated with TSCA.

Let me know if you have any questions.

Rick

Subject: Chemours Notice of Violation

This item was in the OECA report to the Administrator.

Chemours Notice of Violation

On February 13, 2019, EPA issued to Chemours a Notice of Violation related to PFAS regarding the results of two TSCA compliance inspections. One was performed at the Fayetteville Works Facility in Fayetteville, NC and the other at the Washington Works Facility near Parkersburg, WV. In the Notice of Violation, EPA identifies multiple violations, including failure to submit a significant new use notice for two chemicals at Fayetteville Works and failure to meet the GenX emissions control requirement of the 2009 TSCA 5(e) order at Washington Works.

Rick, please get me the final version of the NOV and the inspection report.

Thanks. Cecil.
